Computer and Internet Use Policy

Purpose

The Hinsdale Public Library (HPL) Board of Trustees has established the following policy to guide the provision of access to public computers (including laptops, tablets, and related devices) and the Internet to Library patrons. The Board's intent is to provide access that fairly and effectively serves the diverse needs of the citizens of the Village of Hinsdale. Offering free public access to the Internet is consistent with HPL's mission to support lifelong learning. HPL's policy in this regard reflects the principles articulated in the following statements by the American Library Association:

- [Library Bill of Rights](#)
- [Access to Digital Information, Services and Networks](#)
- [Freedom To Read Statement](#)

Internet Access

HPL provides its patrons with free, unfiltered access to the Internet via public computers, its wireless network, and circulating devices.

Patrons using the Internet at HPL or on Library-issued devices agree to the conditions of the Internet User Agreement (appended). Failure to comply with the terms of the User Agreement may result in the loss of computer privileges and, in the case of damage to HPL's equipment or criminal activity, fines and/or legal action.

Internet access at HPL is unfiltered, and children under 14 years of age must have permission from their legal guardian before accessing the Internet from HPL's public computers. Guardians may agree to the terms of the Internet Permission Statement when their child is issued a card, at any time after that, or by giving oral permission each time their child wishes to use the Internet. By granting permission for a child to access the Internet at HPL, guardians agree that the child's use of the Internet is subject to the terms and conditions of HPL's Internet User Agreement (appended).

Fees

No fees are charged to access the Internet or to use HPL's public computers. Digital storage devices may be purchased at the Patron Services Desk.
